Dear Hiring Team,

I am excited to apply for the Vice President of Operations & Growth position with HVAC RNTL.

What immediately attracted me to this opportunity was the emphasis on building an organization capable of sustained growth rather than simply managing day-to-day operations. Throughout my career, I have consistently been brought into organizations at pivotal stages of growth to strengthen leadership teams, develop scalable operating systems, and create the management infrastructure necessary to support long-term success.

My background spans technical field services, regulated industries, multi-site operations, and executive leadership. I have led organizations supporting mission-critical healthcare, pharmaceutical, laboratory, manufacturing, semiconductor, and government environments where safety, customer confidence, operational discipline, and reliable execution were essential. More recently, I have focused on building enterprise operating systems that improve organizational performance, strengthen accountability, and enable sustainable growth.

Although my background is broader than equipment rental alone, I believe that breadth is one of my greatest strengths. I have repeatedly entered complex technical industries, developed deep operational understanding quickly, and built the systems, teams, and leadership structures that allowed those organizations to scale. I enjoy helping technical organizations mature without sacrificing the entrepreneurial culture that made them successful.

HVAC RNTL's commitment to operational excellence, leadership development, and customer experience aligns closely with the work I have spent my career doing. I would welcome the opportunity to discuss how my experience building organizations and leading operational transformation can contribute to the next stage of your company's growth.

Thank you for your consideration. I look forward to speaking with you.

Very respectfully,

Evan F. Parnell
